

- ✓ BKR portable radio provides familiar PTT voice interface for users operating in demanding environments
- ✓ InteropONE™ application and smartphone provide the connection to the InteropONE™ cloud-based server
- ✓ Extend voice communications beyond LMR coverage
- ✓ Enable your team to use rugged, purpose-built BK Technologies® radios optimized for their needs
- ✓ Gain improved situational awareness of groups including membership and active users

InteropONE™ BKRplay™ Functionality

BKRplay™ is a feature of the InteropONE™ application that enables seamless integration between a smartphone running InteropONE™ and a BK Technologies® BKR Series portable radio.

Once connected, the radio acts as a control interface for the application, allowing field personnel to make and receive InteropONE™ calls on the radio without touching their phone.

BKRplay™ brings together the rugged, mission-ready reliability of BK Technologies® radios with the intuitive, data-rich experience of a modern smartphone. By combining trusted radio performance with InteropONE™ and smartphone connectivity, BKRplay™ delivers a more connected and informed user experience for frontline operations.
